itinkubAtor

Entrepreneur in Residence (EiR)

About IT Inkubator (ITI)

ITI commercializes technology from the IT Institutes of the Max Planck Society and Saarland University through building disruptive high-tech startups or licensable products. We support our ventures not only with substantial capital on favorable terms but also strong industry and financing expertise and contacts, IP support, professional software development, project management and environment.

About the Job

This role is for a project, building a cutting edge HDR deghosting solution interesting among others for companies in the entertainment sector like Disney as potential licensees. We are currently looking for an entrepreneur in residence for three month either full or part time to support our licensing efforts as well as support the inventor of the technology (a recent Max Plank / Saarland University PhD graduate) with his software development work. We offer lots of freedom, good salary and the opportunity to participate in future startup projects.

Who we´re looking for

You are very successful in your studies or already got an outstanding degree and preferably already have gathered first professional experience in software development and marketing. You are a skillful programmer able to catch up quickly with existing code and improve it. Moreover, you have a proven track record of personal, academic and professional achievements. You are independent, flexible and goal driven.

Must haves:
- Expertise in C++ (templates, const correctness, debugging/profiling)
- Good knowledge of OO design and design patterns
- Experience in Linux or OSX (homebrew/port) environments
- Experience with OpenCV

Bonus Skills:
- Knowledge of photography processing algorithms (demosaicing, denoising, white balancing, color-correction, alignment) and HDR photography
- Knowledge of HTML5/Javascript
- Experience with versioning systems (git)

Ready for the challenge?

Send us your application either in English or German to jobs@it-inkubator.de
